

Impey Launches New RIBA CPD Module on Showering Adaptations

The UK's founding wetroom brand, Impey, has added a RIBA CPD seminar to their portfolio, ideal for specifiers and OTs who are keen to develop technical knowledge of bathroom adaptations and easy-access showering solutions.

Sharing their unrivalled technical knowledge of the bathroom adaptations sector, the team at Impey, is now offering CPD training on accessible showering in their new RIBA CPD training seminar: Showering Adaptations: A Guide to Specifying Wetroom and Accessible Showering Equipment.

The course covers the following elements:

- Growth in the requirement for accessible showering
- Benefits of wetrooms, level access and low-level access showering
- Specification of adapted bathrooms, including safe showering and slip resistance
- Surveying prior to adaptation: hints, tips and checkpoints for drainage and adaptation aids

The seminar can be organised at a location of your choice or at Impey's training facility in Somerset.

James Walker, Specification Manager explained: "Our new CPD is designed to promote a greater understanding of the requirement for inclusive showering options in all environments."

The Impey portfolio includes EasyFit wetroom floor formers, LevelGrade wetroom screed templates, WaterGuard tanking kits, glass-screens, underfloor heating, accessories, shower-seating, and a wide variety drainage grates.

Impey supplies healthcare trusts, care and retirement developments, councils and homeowners with level access showering solutions for elderly and disabled users. Their portfolio also contains shower trays, support rails, pumped drainage options, showers and other accessories
