

HANDYPERSON

Foundations announce link-up between TrustMark and Quality Mark

Foundations has been appointed as a scheme operator for TrustMark for the handyperson sector.

Foundations can now offer TrustMark validation as an optional add-on to our Quality Mark Handyperson validation scheme (for both HIA and non HIA based handyperson services).

We believe this is an excellent opportunity for Handyperson services to obtain this valuable, and highly regarded mark of quality assurance.

Advantages to obtaining TrustMark

- TrustMark is a national, government backed trade registration scheme
- The TrustMark website receives approximately 300,000 to 350,000 hits a month from members of the public searching for accredited contractors
- The TrustMark website will now be able to include a section especially for handyperson services
- TrustMark and its registered contractors are at the forefront of the drive to eliminate rogue contractors from the market

For more information on Foundations Quality Mark and the TrustMark scheme, contact Alyson Barnes on abarnes@cel.co.uk, or log onto the Foundations web site: www.foundations.uk.com
